

Prestressed Flooring

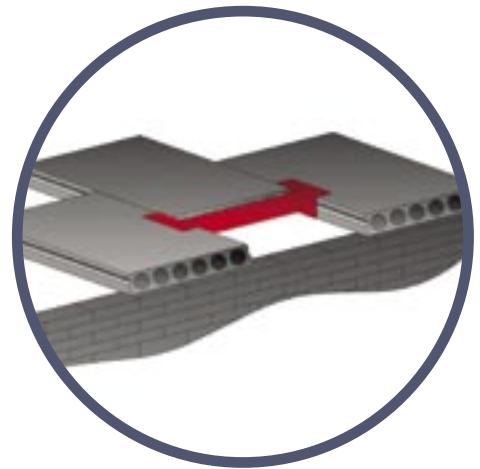

SpanWright.co.uk

Working Platform - In most cases formwork and propping is not required allowing open spaces above and below to facilitate following trades

Safe Offloading - Air mattress systems around trailers provide for safe offloading

Holes for service - Holes can be pre-formed during manufacture to accommodate services, these holes need to be taken care of at the design stage. For details contact our technical department

Finishes - In house fitting crews can leave slabs finished with grout connections filled or, in the case of composite options structural toppings can be placed over the entire area subsequent to installation by Wrights
